| | A0428 | AMBULANCE SERVICE, BASIC LIFE SUPPORT, NON-EMERGENCY TRANSPORT, (BLS) | |

This request will be processed per the standard organization determination timeframes. If this request needs to be treated as "expedited", please note clinical justification why applying the standard timeframe for a determination could seriously **jeopardize the member's life, health or ability to regain maximum function**:

Authorization does not guarantee or confirm benefits will be paid. Payment of claims is subject to eligibility, contractual limitation, provisions and exclusions. Please refer to www.healthteamadvantage.com for specific codes requiring a prior authorization.

Medical Necessity

Please document the medical necessity here:

LCD Ambulance Services (L34549)

B. Non-Emergency (Scheduled) **AMBULANCE** Service (Ground):

Three criteria determine whether a beneficiary has Medicare coverage for non-emergency (scheduled) **AMBULANCE** services:

- * Only when transportation by any other means of transportation is contraindicated by the medical condition of the beneficiary;
- * Only to specific destinations; and
- * Only when certified as medically necessary by a physician directly responsible for the beneficiary's care

NOTE: All three of the above criteria must be met.

Medical Reasonableness:

AMBULANCE transport in non-emergency situations must meet medical necessity guidelines.

1. Medical reasonableness is established for non-emergency **AMBULANCE** services when the beneficiary's condition is such that the use of any other method of transportation (e.g. taxi, private car, wheelchair van, or other type of vehicle) is contraindicated.

NOTE: Bed confinement does not include a beneficiary who is restricted to bed rest on a physician's instructions due to a short-term illness. Bed confinement, by itself, is neither sufficient nor is it necessary to determine the coverage for Medicare **AMBULANCE** benefits. It is simply one element of the beneficiary's condition that may be taken into account in the A/B MAC determination of whether means of transport other than an **AMBULANCE** were contraindicated. Examples of situations in which beneficiaries are bed-confined and cannot be moved by wheelchair, but must be moved by stretcher include:

- Contractures creating non-ambulatory status and the beneficiary cannot sit
 - Severe generalized weakness
 - Severe vertigo causing inability to remain upright
 - Immobility of lower extremities (beneficiary is in a spica cast, fixed hip joints, or lower extremity paralysis) and unable to be moved by wheelchair.
- If some means of transportation other than an **AMBULANCE** (e.g. private car, wheelchair van, etc.) could be utilized without endangering the individual's health, whether or not such other transportation is actually available, no payment may be made for **AMBULANCE** service.
 - If transportation is for the purpose of receiving an excluded service (e.g. a routine dental examination) then the transportation is also excluded even if the beneficiary could only have gone by **AMBULANCE**.
 - If transportation is for the purpose of receiving a service that could have been safely and effectively provided at the point of origin, then the transport is not covered even if the beneficiary could only have gone by **AMBULANCE**. Examples include (a) A transport from a residence to a hospital for a service that can be performed more economically in the beneficiary's home, and (b) A transport of a SNF beneficiary to a hospital or to another SNF for a service that can be performed more economically in the first SNF.
 - AMBULANCE** transportation for services excluded from SNF consolidated billing must meet the criteria as reasonable and necessary (i.e. other means contraindicated).
