

The HTA Senior Savings Model for Insulin

Once again, beginning January 1, 2022 our HealthTeam Advantage Diabetes & Heart Care HMO CSNP (chronic special needs plan) will offer eligible insulin products on our Select Care Tier 6 prescription drug formulary. This means these eligible insulin products will have a \$0 copay that extends from the deductible phase through the coverage gap.

Nearly one in three Medicare beneficiaries has diabetes and approximately 3.3 million beneficiaries use one or more common forms of insulin. The \$0 copay through the Senior Savings Model reduces the financial barrier to obtaining insulin, which is a crucial part of many diabetics' treatment.

Medications Covered in the 2022 Senior Savings Model

It's important to note that not all injected medications that are used to treat diabetes are an insulin or insulin analog. The Tier 6 insulin medications that are covered by this \$0 copay are indicated by SSM (Senior Savings Model) in the requirements column in our formulary.

The following insulins are covered under the Senior Savings Model with a \$0 copay through the coverage gap:

- ◆ Fiasp®- Pen, FlexTouch® & Vial
- ◆ Insulin aspart prot & aspart- FlexPen®, Penfill & vial
- ◆ Lantus®- Solostar & Vial 100u/ml
- ◆ Levemir®- FlexTouch & Vial- 100u.ml
- ◆ Novolin® 70/30 Vial, FlexPen 100u/ml
- ◆ Novolin® N & R Vial, FlexPen 100u/ml
- ◆ Novolog® FlexPen & Vial
