Service: Category III CPT Codes - Description

This policy applies to all lines of business, including Medicare Advantage plans.

The American Medical Association (AMA) is responsible for developing Current Procedural Terminology (CPT) Category III codes to track the utilization of emerging technologies, services, and procedures. The Category III CPT code description does not establish a service or procedure as safe, effective, or applicable to the clinical practice of medicine.[1,2]The codes apply to a procedure or service that is (or has been) performed on a patient and any of the following[3]:

- There is support by at least one CPT or Health Care Professionals Advisory Committee (HCPAC) member that represents providers who would use the procedure or service; or
- The potential or actual clinical efficacy is supported by evidence-based, peer-reviewed literature; or
- There is at least one approved study protocol by an Institutional Review Board (IRB) for the study of the procedure or service; a current trial in the United States (ongoing or current) that outlines efficacy; or other evidence of clinical utilization.

Section 1862(a)(1)(A) of the Social Security Act (SSA) is the statutory basis for denying payment for types of care, items, services, and procedures, not excluded by any other statutory clause, while meeting all technical requirements for coverage, that are determined to be any of the following[1]:

- Not generally accepted by the medical community as safe and effective in the setting and for the condition for which it is used;
- Not proven safe and effective based on peer review or scientific literature;
- Experimental;
- Not medically necessary for a particular patient;
- Furnished at a level, duration, or frequency that is not medically appropriate;
- Not furnished in accordance with accepted standards of medical practice; or
- Not furnished in a setting appropriate to the patient's medical needs and condition.

Items and services must be established as safe and effective to be considered medically necessary. That is, the items and services must be[1]:

- Consistent with the symptoms of diagnosis of the illness or injury under treatment; and
- Necessary for, and consistent with, generally accepted professional medical standards of care (e.g., not experimental) and;
- Not furnished primarily for the convenience of the patient, the provider or supplier; and
- Furnished at the most appropriate level of care that can be provided safely and effectively to the patient.

Medical devices that are not approved for marketing by the United States Food and Drug Administration (FDA) are considered investigational and are not considered reasonable and necessary under Section 1862(a)(1)(A) of the SSA. Medicare payment, therefore, may not be made for procedures performed using devices that have not been approved for marketing by the FDA unless performed within the context of a clinical trial qualifying under the Centers for Medicare & Medicaid Services (CMS) National Coverage Determination (NCD) for Routine Costs in Clinical Trials (310.1) or in an approved FDA Investigational Device Exemption (IDE) trial.[1]

Applicable policies that consider a CPT Category III code medically necessary are noted in the coding table below. Due to the frequency of updates by the AMA and CMS, the codes listed in this policy may not be all-inclusive. Codes that are deleted and not effective at the designated time of service may be ineligible for reimbursement.

Service: Category III CPT Codes - Medical Necessity Criteria

- Cohere Health considers the codes listed within this policy to be clinically unproven and not medically necessary due to inconclusive evidence of their effectiveness.   - Centers for Medicare & Medicaid (CMS) Services National or Local Coverage Determinations (NCDs or LCDs); **OR**
  - State-specific guidance; **OR**
